

Targha Brass Audio Entry Panels

The brass Targha entry panel provides a classic solution for historical and prestigious buildings, perfectly complementing installations calling for a hint of retro design and modern, refined surroundings.

With its sectional options and small size, it can also be used for blocks of apartments with the panels mounted side-by-side to create an appropriate amount of calling buttons.

Main features:

- The panels can be recessed in the wall and have special burglar-proof screws to ensure their resilience
- Traditional backlit name cards can be replaced with engraved brass names to further enhance the appearance and both options are included with the panels, as well as a cleaning kit
- Each panel is 250mm high, 99mm wide and 20mm deep
- Entry panels are available for both System 200 and 300

Audio entry panel - HPC/*OT

- Supplied with a single button, it can accommodate no buttons or up to 4 additional buttons

Expansion panels - HPP/6OT

- The six-button expansion panel, combined with audio front plates, allow up to 10 way communication

Accessories

- Targha audio entry panels require a HA/200 audio module
- To recess the panels, you will need a HTS back box, which measures 51.5mmD x 90mmW x 198mmH
